

AutoPilot: The Ultimate Sales & Service Engine

AutoPilot is the first and only platform that **identifies active, in-market shoppers** — for both sales and service — and **engages them with personalized, human-like conversations** that drive them directly to your dealership.

HOW IT WORKS: 2 POWERFUL ENGINES, 1 SEAMLESS PLATFORM

IDENTIFY

Client Command's Active Shopper Network indexes 60 billion+ web pages daily to pinpoint who's actively shopping for a vehicle deterministically, what's in their consideration set, why they'll buy, and the ideal time to engage.

ENGAGE

STELLA, the automotive industry's leading conversational AI, seamlessly engages shoppers via voice, text, or web chat with natural, personalized dialogues that book appointments or deliver frictionless live handoffs, while whisper technology equips dealership staff with real-time customer insights.

PILOT PROGRAM RESULTS

28 Influenced Vehicle Sales

147 Influenced Service Appointments

BENEFITS

- Precision Targeting
- Market Capture
- Seamless Experience
- Rapid Deployment
